BLAKE'S PATENT PIRE-PROOF PAINT.
THIS ENTRAORDINARY SUBSTANCE, which in a
Tew months after applied turns to clate or stone, protecting whatever covered from the action of the weather
and are.

seeing whatever covered from the action of the weather and are.

LOOK OUT FOR FRAUD.

As scores of individuals are getting up all kinds of worth-less counterfest auff, and selling it as dire proof paint. I have the statements of more than twenty men of the high-set standing in Ohio in the vicinity of the mine, who have seen, and some used, this counterfest stuff, who gave me a sancement saying that there had been such a complete failure in all the kinds of stuff got up and sold here, called fire-proof pain, except Blake's, that his only is considered worth using. Every person, therefore, to be safe, should see that my name is on every package, for if they get the powder that will make the genuine fire-proof paint like mine, they make themselves hable to a prosecution for an infringement of my patent; and if they get a counterfeit, of course loss their money. The genuine article of different colors, both ground in oil and in dry powder, kept constantly on hand at the general depot, 84 Fearlest.

Send on your orders to DEWITT & DAVENPORT, Tribune Buildin

webster's trial.

Second Edition, revised - From the Phonographic Report of Dr. James W. Sione, and as presented to the Twelve Jurymen. The great interest taken in the trial of Prof. Webster induced the publishers to furthish an accurate edition for preservation and fature reference. No expense was spared to secure the most thorough and correct report which it was possible to make.

The charge by Chief-Justice Shaw, and the arguments of Attorney-General Clifford, were carefully corrected by themselves; and shough some remarks have been made by the "defendant's counsel" relative to theirs, yet the nuderationed feel that the reporter is so well known for his accuracy and fidelity in reporting public speeches, that they do not hesitate to say that this edition consists nearly word for word, the arguments of Counsel, both for the Government and the Petsoner, as they were uttered force the Court, and the men who gave the verdict.

So short a time intervened between the close of the trial and the issue of the first edition, that many typographical errore escaped the eye of the proof-reader; but in this odition they have been carefully corrected; and the publishers again say, that it is now as near accurate as it is possible to be. Published in I volume 8vo. 320 pages, paper covers, 50 cents; in law sheep, \$1. For sale by booksellers generally throughout the city.

PERCHITTORY SALS OF \$300,000 BEVEN PER CENT, RAILROAD BONDS.—By a resolution of the Board of Directors of the Cayung and Susquehanna Railroad Company, the Finance Committee of said Board were authorized to sell all the bonds of the Company at public auction on THURSDAY, May 16, on which day they will be offered for saie by WM H. FRANKLIN SON, at 12 o'clock, at the Merchants' Bricharge.

This Road was formerly known as the Blacan and Owego Railroad, and originally cost more than \$700,000. A portion of the funds were borrowed from the State, and on dealt in payment, the mortgage was foreclosed and the Road was bought in by a new Company, and its name changed by Legislative enactment. The New Company have established the same guage as the Eris—have re-laid the entire line with a heavy T rail, and have previded new locomotives, cars, and all the machinery necessary for running the road. Its length is 31 miles, and the amount expended by the new Company, in addition to the original coat of the Road, is about \$450,000.

This road, with the exemboats on Cayung Lake, connects the Eris Railroad with the Central line at Cayung Bridge, extending west, making the shortest route from New York to Bullato. The owners of the Cayung and Susquehanna Railroad are likewise mainly the proprietors of the Liggetts Gap Railroad, now being constructed from the Lakes with anthracile coa—most of which is destined to passover the Cayung and Susquehanna Railroad—and while this road is now earning its expenses and a fair dividend on its capital stock, it will be, when the Liggetts Gap Railroad is finished, one of the most profitable and important roads in the country.

The entire amount of bonds issued by the Company is \$300,000, in sems of \$3,000 each, payable in fifteen years, with interest, semi-annually, at 7 per cent at the Mechanics' Rank in this City. The mortgage is made to Shepherd Knapp and D S Miller. Eaga Trus basement.

FOR SAN FRANCISCO. CALIFORNIA
FIRST VESSEL-DISPATCH LINE: Frast-sating ship GREAT BRITAIN, having a large pertion of her cargo engaged and now going on board at Pier 6, North River, will have quick dispatch for the above port. was formed between the two last named establishments, which raised the river some 20 feet above low water mark. About 1 o'clock on the morning of the 5th it broke up, sweeping off two new unlinished dams of Adams, Cawley & Curts, the protection pier and part of the under frame work of Johnson & Knight's mill, the new slide of the same establishment, and about 30,000 feet of lumber. A fate of the 8th chronicles the entire loss of Johnson & Knight's mill with 70,000 feet more of lumber, and the breaking of Baker & Co.'s beam. The entire loss estimated at \$15,000 to \$20,000. On the morning of the 6th James Dearbin and James S. Conbett ard. Striking a cross current they were thrown into the river, passed over the dam, and were drowned. Dearbin was a young man, from Iowa; Conbett a married man, from Michigan. On the 7th six mea went out into the eddy below the falls in a canoe. The canoe capsized and five of the men reached the shore. The sixth, a German, struggled in the water; a fellow-countryman on shore rushed in to his

be from \$700,000 to \$900,000, which is very great, considering that the population is only about 5,000. Such is the scarcity of houses here, that many families have gone to Campeachy; everything is paralyzed, and nothing is talked of but this awful

In these prodigal days of investigations by Congress, it requires all the industry a man possesses to keep pace with their proceedings. The EWING Committee, from which so much was expected, and so much promised by the instigators of the in-vestigation, will in the end turn out a water-haul-Some days since they called upon the Secretary of

Mr. Dawson, in the Senate, called upon the Department of the Interior, by resolution, for all the facts and information, as well as copies of correspondence, &c. not already communicated to Con-gress, connected with the Mexican Boundary Commission. The answer to this resolution wil disclose, that, numerous as have been the Com mittees of Investigations, one more at least could have been added to the number with both profit and instruction to the public. Weller exhausted and drew from the original appropriation of \$50,000, the whole with the exception of \$600.— There are also debts incurred by him, and for which the Government is liable, for over half the amount of the first appropriation, and not a foot of the boundary line has yet been run. I learn, in addition to this, that the Mexican Commissioner, in behalf of his Government, has protested by letter against the adjournment of the work that took place; and claiming indemnity from the United States for some forty thousand dollars useless expenditures, as he says, owing to the failure on the part of this Government to continue the work as provided for under the Treaty. If this information turns out to be correct, it would seem that, so far from the Mexican Commissioner assenting to the auspension of the work, he is claiming indemnity for the damages sustained by his Government owing thereto. But as this trifling with the public interests, and unparalleled waste of the public monay has been accomplished under Loco-Foco direction, it would be considered by the majority in congress as mere "trash," and an investigation would be denied if asked for.

The Committee on the Galphin case will not report before the last of this week, or beginning of next. Two reports will be presented and at the meeting of the Committee to day, it will be determined by a formal vote whether the majority is for or against the legality of even the principal of the claim.

Mr. STANLY succeeded this morning in getting addition to this, that the Mexican Commissioner, in

or against the legality of even the principal of the claim.

Mr. STANLY succeeded this morning in getting through his resolution authorizing an investigation into the defalcations, &c. of Loco Focos. If the Committee will only be industrious an exposure can be made that will erimson the check of the most obdurate of our political opponents. As the good book says—"Let there be light."

Mr. CROWELL of Ohio also introduced a resolution which was passed, calling upon the Secretary of War as to information, &c. touching the virtual surrender of Santa Fé and the adjacent Territory to the Texan civil authorities of the jurisdiction over the soil by the military authorities of the United States. This is like locking the stable after the borse has been stolen. The "non-interference" doctrine so strenuously contended for in certain quarters has been the linearument through which the free soil of New-Mexico has become tainted with the curse and the scourge of Slavery, and Territory enough is thus grappled to make another Slave State. The friends of Freedom have slept upon their posts, and been lulled into a false security by this deceptive cry of "non-interference," and now, when the crack of the slave-driver's whip comes echoing from the free soil of New-Mexico, the alarm bell is rang among the sleeping sentinels, and resolved.

Flood on Black River-Loss of Property and

From the Galena Advertiser of April 30.

The following particulars of the losses of life and property, occasioned by the late flood on Black River, Minnesota, are gathered from the Prairie du Chien Patriot: On the 2d of April there was about 18 inches of snow on the grooma's a brisk rain commenced on that night and continued through the next day. The river rose and broke up the ice, some of it a foot and a half thick, making a clean sweep of the new dam of Lane & Blanchard. On

The Conflagration at Laguna.

The Conflogration at Laguna.

A letter from Laguna de Terminos, dated March 24, gives the first particulars we have seen concerning the conflogration by which from one half to two-thirds of the town was destroyed. The incendiary fired a cluster of thatched houses in the center of the town, and the flames spread with exceeding rapidity. Of all the commercial houses, only two remain—those of Gutiener & Co. and Precial, Gual & Co. The letter adds:

The house of Gutiener & Co. lost a large amount in houses, as also the house of Precial, Gual & Co; but it is impossible, at this time, to name the amount. The whole loss is variously estimated to be from \$700,000 to \$900,000, which is very great,

We received news to-day, that several houses were burned in Palazada, a few days ago, and also some in Champotan; so it appears that the game of the interior is being played upon us.
